

A Community to make the world a better place

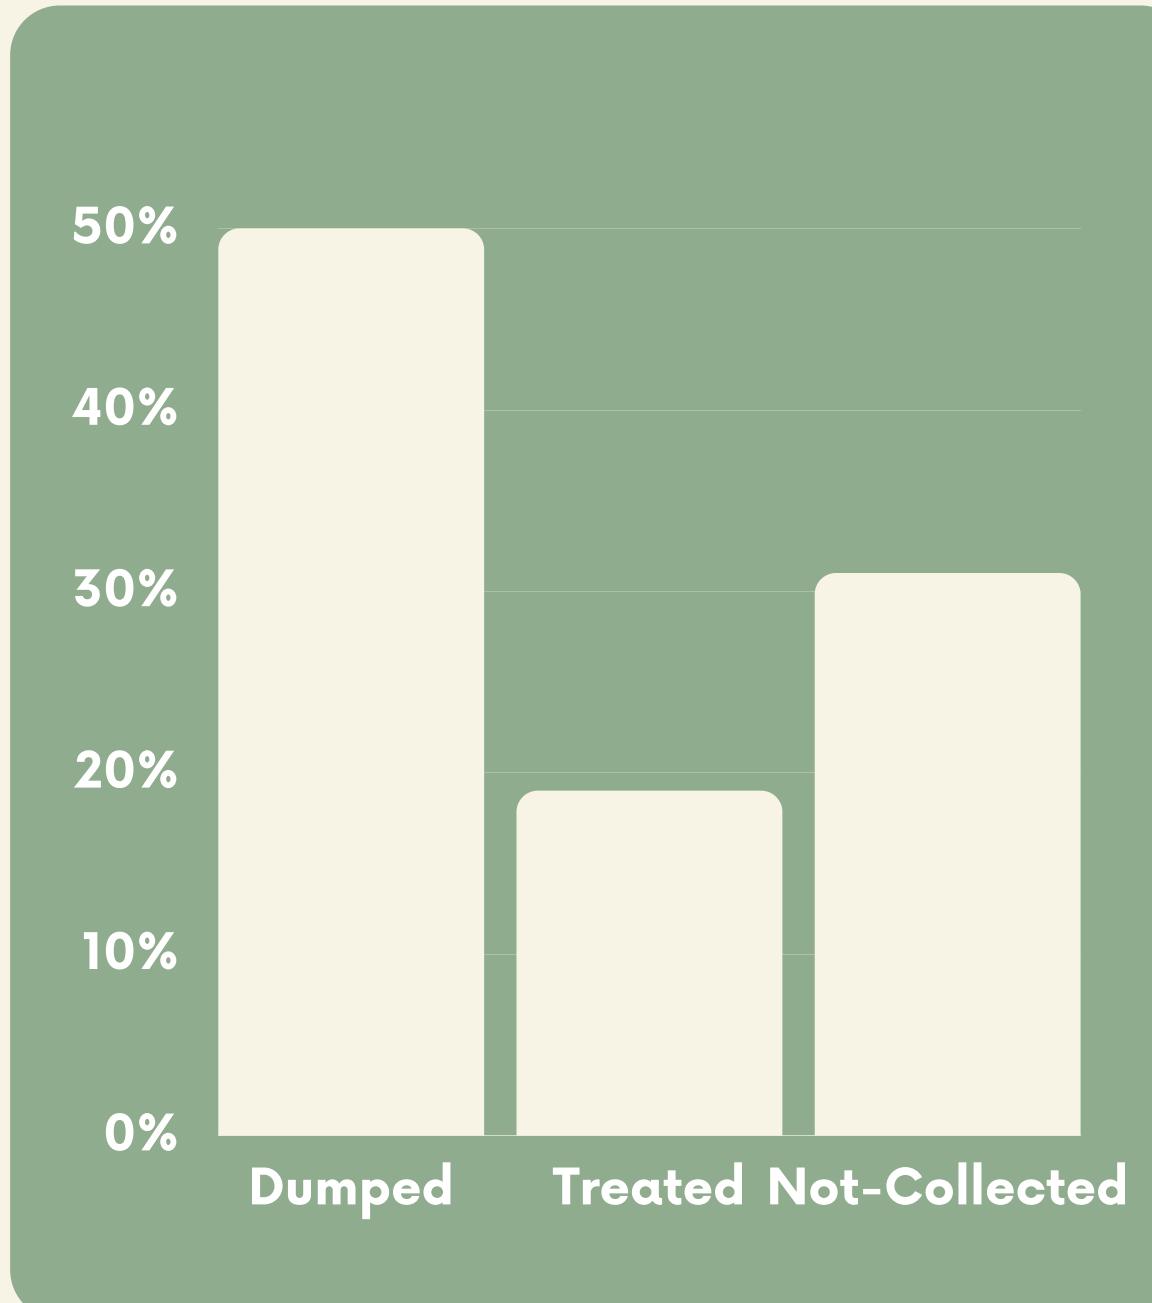

CHALLENGES

Unavailability of proper waste disposal infrastructure

Insufficient knowledge on how to dispose of everyday and electronic waste.

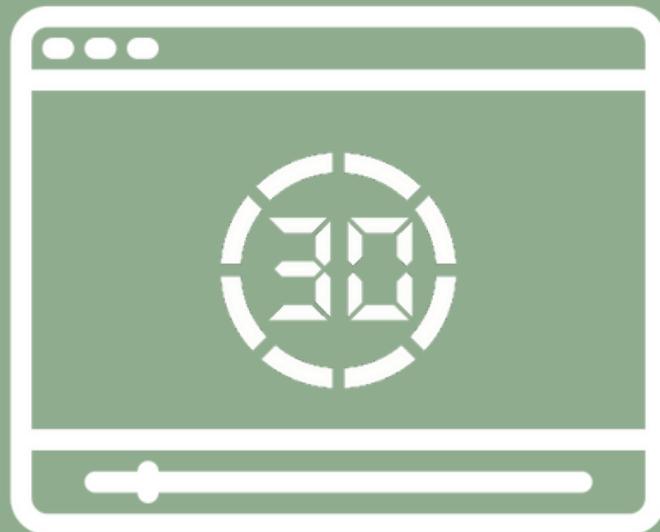

Plastic waste and everyday 'use and throw' items are increasingly contributing towards water, ground, and air pollution.

OUR SOLUTION

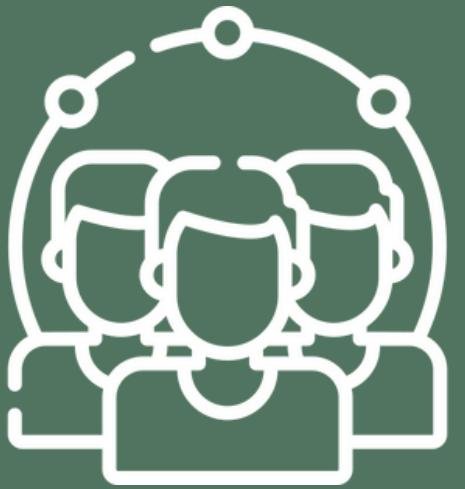

Meadow

a community to make the world
a better place

A short-form video platform to share and experience a plethora of ideas ,skills and experiences to make the world safer, greener and cleaner.

Users'll be getting hand crafted artifacts, souvenirs and other goodies made with unconditional love of individuals living in some of our colaborated old age homes, orphanages, NGOs.

Our Community-based model will create a self-sustaining platform that will lead to lower input from us and promote contribution from the users.

People can share their journey of being carbon neutral and motivate users to take part in more eco-friendly activities.

We will help people to connect directly to NGOs that promote sustainable development and contribute towards a more eco-friendly society.

We will provide step-by-step guides on how to grow more plants and promote reforestation.

CONNECTING

Corporate

Corporate gifting a popular trend among organisations, have paved their way into this business adding benefit of supporting the artisans from various NGOs who make it, adding revenues for their survival.

NGOs & GOVT. Agencies

We collaborate with various old age homes, orphanages, NGOs and some other govt. agencies to help them to generate revenue through their hand curated artifacts for their better living.

Driven citizens

Ardent individuals with their , impressive skills and interesting DIY ideas influence others users to manage junk strategically , use resources judiciously and create world a better place to live.
